The Women's Missionary Society held their Annual meeting in St. Andrew's Church last Thursday afternoon; the annual report was read which showed that the past year had been good and the society was in good shape.

Officers elected for the year were: President, Mrs. J. F. Hurlbut; Vice President, Mrs. Geo. Calder; Secretary-Treasurer, Mrs. J. Pollett.

After the business was over a short program was given to which the public had been invited, as follows:

"A Better Day is Coming" song by audience; Scripture reading by Mrs. Caldecott; prayer by Mrs. Still; a very interesting paper on "Mission Work" read by Mrs. Gillett; a reading by Mrs. A. C. Gage; hymn by all; recitation by Mrs. Emerson; and a solo by Mrs. Pollett entitled "Nothing but Leaves". The Glee Club gave three selections on mandolin, all of which was thoroughly enjoyed by all a lunch was served afterwards.

Constable Howe of Foremost was here on Saturday last and attended the foot ball meeting, after which he left for Medicine Hat returning to Bow Island Monday morning enroute for Foremost.

Mrs. J. Pollett returned home on Monday morning last after being West on business since last Friday.

Mr. and Mrs. Bradner called on Mr. and Mrs. Webb on Sunday last.

Mr. Minty and the Masters Abbott were visitors at Mr. and Mrs. Webb's on Sunday last.

Mrs. Chas. Scott and neice and Mr. and Mrs. A.E. Tunstall and baby and Mr. R. McLaughlin were the guests of Mr. and Mrs. Bradner on Sunday evening.

An emergency meeting of the Royal Order of Gobbling Gobblers was held in Bow Island on Saturday 10th, when Mr. Buehring of Winnifred and Mr. White of Foremost were initiated. High Roosting Gobblers Reigh officiated in the absence of Supreme High Gobbler Foster who was a fraternial visitor at the Taber Lodge Saturday last.

Mr. Dick of the Union Bank Staff motored to Medicine Hat on Saturday 10th, to spend the week end.

Mrs. Garrow has gone on extended visit to Vancouver.

Mr. and Mrs. King are expecting to leave for Trochu in the near future where they will work in Mr. Salter's Garage.

Mr. King and Son Homer are expecting to leave for Trochu in the near future where they will work in Mr. Salter's Garage.

The Ladies Institute met in the Rest Room last Saturday afternoon.

The Glee Club went out to Westfield last Friday evening. They played a couple of pieces and then Rev. Gilbert gave a short address, they then played again, after that the Westfield boys put on a play, then Mr. Gilbert gave another short address, after the programme there was a nice social served.

The Rebecca Lodge met in the I.O.O.F. Hall last Friday evening, after the business was over there was a social evening, there was dancing for two or three hours and good music was supplied by Mrs. Rolfe, Helen Leary and Frank Grund. Lunch was then served by the ladies.

Mrs. C. Hoaglin of Medicine Hat was a visitor to Bow Island this week.

Miss Dunn of Medicine Hat was a week end visitor to Mr. and Mrs. Roy Bottie.

Mrs. Swannison went to Medicine Hat on Tuesday 10th to visit friends in that city for a few days.

Mrs. Larsen of Winnifred was a business visitor to Medicine Hat on Wednesday last.

The Rock Club was entertained by Mrs. E. Thompson for the last time of the season on Wednesday 12th. Mrs. Rock won first prize and Mrs. Hurst second prize.

Mr. Pete Neugold was preparing to absent the early part of this week.

We hear lots of different opinions on Hatfield who says he is not a rain maker but persuades the moisture from the clouds, he shall soon be able to learn of his good work.

Mr. Chas. Thompson went out to his farm on Monday April 18th.

Constable Brauner was a business visitor to Winnifred on Saturday last.

While teaching the children last Sunday Mrs. Riffsworth was taken ill and had to be conveyed to her home, her friends hope that she will soon be around again.

Mr. Ed. Downing came home from Bassano to spend the week end with his family, returning to Bassano on Monday morning.

Mr. R.M. Salisbury has rented his farm to Mrs. Nels Lemberg, who will shortly locate there.

Miss Knox was a business visitor to Taber on Friday last for the purpose of interviewing a dentist.

Mr. and Mrs. Still motored out to their farm on Friday last.

Mr. Salisbury from Winnifred district was a business visitor to town on Friday last.

Mr. Hagen was a business visitor to Taber on Saturday last. Mr. Hagen sold a couple of houses to someone at Taber last year, they not being contented with their new home they had to pay a visit back to the old one here, Mr. Hagen took them back to Taber Saturday last.

Mr. King was a business visitor to Taber on Saturday last.

Will meet on Saturday April 23rd.

**Car Accident
near Burdett**

**Mr. Hillis of Winnifred is
Severely Hurt**

Messrs. Buehring and Mr. Wilcox and Judd Davison who was driving, of Bow Island while returning from Grassy Lake on Monday evening about 7 o'clock. In some way the car ran off the road and overturned, breaking the windshield and about breaking the two hind wheels off. Mr. Buehring received injuries to his knee and Hillis of Winnifred received severe injuries, the right shoulder being ruptured and also sustained a sprained wrist, he was unconscious for some time, but was recovered by Dr. McPhail who remained with him all night the Dr. had small hopes of his recovery, Mr. Buehring is suffering from a stiff neck and says he is thankful to get off so lightly.

Constable Brauner interviewed the four occupants of the car on Wednesday, Mr. Hillis is still in bed and is doing as well as can be expected.

Several of our farmers have already

commenced to work on the land.

Mrs. Frank Ley went last week to stay for a time with Mrs. John Ley whose little baby is sick.

Mrs. Ley has since returned and says the baby is recovering.

Mrs. R. H. Robertson was a caller on Mrs. Avery last Sunday, and made kind inquiries as to Mr. Avery's health, who is progressing we hope favorably.

Miss Louise Ancion and Mr. Francis Ancion were business visitors to town last Friday.

Mr. and Mrs. Almon Nanson and children were visitors to town last Saturday.

Mr. M. R. Kirsch was a caller at the Review office last Friday, to enquire about the Editor's health and was glad to learn that the Editor was slowly recovering.

Mr. Frank Ley is getting ready for spring work, he was in town last Saturday hauling out feed.

Canada Needs More People

In the development of the natural resources of Canada, and the resultant increase in wealth, for the transportation facilities of the Dominion, is to be found the only positive factor of the problem now presented by the annually recurring, and increasing, deficits in the operation of the National Railways. This was the view expressed in this column last week, and further study of the question only serves to confirm and strengthen that opinion.

It is gratifying to note, too, that the success of this suggested solution is being met with and is being followed by the people of Canada. Such influential men as Hon. T. A. Cresser, President of the C.P.R., Sir Frederick Williams Taylor, general manager of the Bank of Montreal, and other leaders in Canadian affairs, support this view.

It is in the development of our natural resources lies the solution of our railway problem. In increasing wealth we relieve the railroads of their present financial burden, and in turn, the railroads will be able to meet the economic—then the question presents itself as to which of our many resources attention should first be turned as best calculated to quickly respond to well directed Government and individual effort. Also, in the light of existing world conditions, which of our resources will make the strongest appeal to the people of the world? Again, which of our resources, if well developed, will react upon and operate to bring about the development of other resources?

There can be no two opinions as to the richest, the most important, the basic natural resources of this country. It is to be found in the agricultural lands spread over the Dominion from the Atlantic to the Pacific. Valuable as are the mines, the forests, the fisheries of Canada, and necessary as they are to the welfare of the nation, they individually and collectively take second place to agriculture.

The first essential to the development of the untilled acres of Canada's fertile agricultural lands is population. Without people the lands must remain idle and unproductive. Lacking workers on the land, crops cannot be produced. Unless our unsettled lands are peopled with workers who will produce, and through their production create traffic for the railways, all our economies in the world will not result in making those railways profitable.

Furthermore, it is only through the placing of people on the land that the necessary demand will be created for manufactured products of all kinds, the demand for which will, in turn, force the development of our manufacturing resources, and thereby create still further traffic for the railways and provide opportunities for an ever increasing body of artisans and skilled workers in shop and factory.

Another million of people settled on farms in Canada and producing wealth from the soil would result in such a volume of products for export in the shape of grains and livestock that many of our now unprofitable lines of traffic would prove paying propositions, because for every dollar's worth of produce shipped out of the land would purchase a dollar's worth of goods to be shipped in.

Yet there are people in this country who are advocating the adoption of the most stringent regulations to prevent immigration into Canada. Nothing could be more shortsighted. All will agree that the bars should be put up to keep out the undesirable, but surely we are not so foolish as to want such as these, who are not producers, who bring little or no menace and burden to the state. But Canada does need and must have a large increase in immigration of the right type of people if it is to develop and prosper.

The most prosperous period in Canadian history was during those years when immigration was bringing into the land at an unprecedented rate and the recent finds of the Dominion were being brought to fruition. Then, our cities, towns and villages grew apace; our railways were busy and constructing new branch lines as feeders; our manufacturers were constructing larger factory buildings and employing many more workers, and activity was manifest in the development of natural resources of all kinds. We had a surplus of labour in the cities, and large numbers of emigrants incurred for transportation and other services which were provided to meet the expected confluence of the influx of new settlers, the stamp came. Then the war put a stop to all immigration for over five years, while at the same time it took its toll of millions of human lives.

The government again presents itself as the largest volume of immigrants to Canada, and in the right type, too. Some national politicians demands that full advantage be taken of the opportunities. If there ever was a time when Canada needed new people to assist in the development of our great resources, it is now. Immigration should be encouraged, and there should be no trouble in selecting and eliminating the small percentage of undesirables at the port of embarkation. The great majority of immigrants come to Canada to better their condition, and have a fair idea of what they are going to do. They should be encouraged to come, and a helping hand and all reasonable assistance and a warm welcome extended on their arrival.

Insatiable Birds

There Wasn't Much Left for the Shipper After the "Ducks" Got Through With It.

A new story is going around the financial district about an old man in a cigar store who was asked by the proprietor of a store to his home to need credit when he'd such a good cotton crop.

"De duck got 'bout all dat cotton, sah," was the mournful reply.

"What do you mean the duck got it?"

"Well, you see," explained the old man, "I sent dat cotton up to Memphis, and de duck deducts the freight, an' de duck deducts the commission, an' dey deducts the taxes—sah, de duck gets 'bout 'all dat cotton an' dat's why I'm here."—Boston Transcript.

THANKFUL MOTHERS

Once a mother has used Baby's Own Tablets for her little ones, she would use them for all the family. The tablets give such results that the mother has nothing but words of praise and admiration for them. There are thousands of mothers throughout Canada who praise the Tablets in Mrs. N.S., who writes: "I have used Baby's Own Tablets for my children and have been very pleased with them. I would urge every other mother to keep a box of them on hand. They are a mild but thorough laxative which regulates the bowels and sweetens the breath. They break up constipation and indigestion, cure bald simple fevers and make teething easier. They are made in 25 cases a box from The Dr. Williams Medicine Co., Brooklyn, Ont."

BORN TO BE OBSERVED.

A bill to abolish pipings, gratuities and perquisites may be introduced in Parliament next session. The measure will receive applause from a lot of people who will disregard it.

There is ground for the contention that tips are extortions that add to the cost of what has been well performed. They are not to be despised, but will serve to live up to their theories. The average man is a coward when confronted by a custom—

Montreal Gazette.

TOBACCO HEART

Every Smoker Read This

Tobacco does not seem to affect all alike. Many who enjoy a cigarette live to a ripe old age and apparently suffer no ill-effects from the use of the weed.

Others are others though, on whose heart and irregularity of its beat, makes the hands tremble, seizes the heart and lungs, causes attacks of breath and loss of sleep.

To counteract this demoniacal influence, the following simple steps will bring strength and restore tone and vigor to the nerves, and remove all the evil results.

Mr. D. McP. Coxhead, N.S., writes: "I was using tonics to strengthen my hands and suffered terribly from palpitation. I had a friend about him, and he advised him to get your 'Milburn's Heart and Nerve Pill.' I did, and am now a happy man again, and they gave great satisfaction."

A Mountain Wilderness

Jasper Park is Largest Big Game Sanctuary in World.

Jasper Park, east of the Yellowhead Pass through the Rocky Mountains, traversed by the Canadian National Railway, on an area of 4,400 square miles. It is twice as large as Little more than twice the size of the province of Prince Edward Island.

Jasper Park is an immense mountain wilderness, partly unexplored. It contains numerous mountain peaks, glacial lakes, snow fields, cataracts, many lakes; also Mount Robson, the highest known peak in Canada. It is the largest big game sanctuary in the world.

It has been estimated that one less rainfall would be made to yield 60,000 horse-power and another 50,000.

All things wait for those who come after them.

Minnard's Liniment For Burns, Etc.

Good Profit in Poultry

Alberta Farmer Who Kept Record Shows that Money Can be Made Out of this Side Line.

An example of the profits that may be made out of raising chickens on prairie farms is given by W. E. Deckard who farms near Bassano, Alta. On January 1st, 1924, he had on his farm two hundred and fifty-eight White Leghorn hens. From these he obtained 1,000 eggs, and sold eggs to the value of \$650.35. They were sold at \$0.075 worth of chickens and the value of the poultry they used at \$1.416. Total profit was \$1,000.14. Against this feed to the value of \$73.99 was bought, and about \$200 of grain raised on the farm was given to the hens. The net profit, therefore amounted to \$786.15—not a bad return from a side line.

The flower of the Mohammedan religion is the violet.

Canada Not Trading

With Belgium

Has Lost Opportunity Says Agent General of Canada.

That Canada had done absolutely nothing toward the industrial reconstruction of Belgium and so lost the opportunity to capture the Belgian market, was the statement of Godfrey Langlois, agent-general of Canada in Europe, in his annual report made before the Chambre de Commerce. Mr. Langlois declared that out of the 300 United States and English agents who gathered in Brussels after the armistice there were not a single Canadian. The Canadian bank had tried to establish a branch there, but his efforts were useless.

He pointed out that New York was sending Canadian goods to Europe and of course to Belgium, and profited by their high profits there. Until he had taken steps to remedy this even the Canadian dollar was not listed on the Brussels stock exchange.

Montreal Gazette.

CARDSTON IRRIGATION PROJECT

Alberta Government Will Irrigate About Fifteen Thousand Acres.

The Alberta Government consulting engineer, D. B. Hays, has just completed an examination on behalf of the Irrigation Branch of the Provincial Government, which has been formed for the purpose of irrigating about fifteen thousand acres of forest land near Cardston in Southern Alberta.

Mr. Hays says the project is quite feasible and is, in fact, the simplest proposition he has ever met with. There are no difficulties to surmount and the construction work can be carried out without any large or expensive equipment. It is expected that work on this project will be begun this summer.

Soft coal is difficult to eradicate, but Dr. Holloway's Cure, Renover will draw them out painlessly.

City of Renover Population.

The New York Tribune is authority for the statement that in the United States there are \$1,18,000,000 persons living in cities, as against \$10,700,000 in rural districts.

Mr. Hays' report is to the effect that

they gave great satisfaction.

Can Soildrifting
Be Prevented?

Editor Bow Island Review:

Soildrifting has taken a heavy toll last year from a large part of the farmers in the three prairie Provinces and so it has done many times before. To remedy this we ought to know first the cause of it. Soil drifting takes place when the fine in the soil has disappeared by frequent plowing and other ways of pulverizing. Seeding the land back to grass for a few years is the only permanent remedy, but the circumstances are not always

so that it can be done and a good result obtained. A farmer can have seeded a piece of land into grass and be proud of the success he seems to have had with it; when the high winds come along a neighbor's field or his own start drifting and take his grass away, turning the success and pride into loss and disappointment. Manure or rotten straw disked lightly into the soil directly after the seedling will also help in preventing soil drifting but most of the farms are too big to undertake this task. So we have to take other means for controlling the drifting and I believe the land can be worked in a way that will reduce the drifting to a minimum if not entirely prevented. Of course the heavy clay soils don't drift at all when the ground is not made too fine and the seedling done at right angles to the prevailing wind. If it is the heavy loam and sandy soils which are most liable to move and even with field those kind of soils will start drifting if the necessary precautions are not taken in preparing the ground. It is not only to work our fields but we ought to know, why and how we have to do it. There should never be done any field work when the ground is dry as this will result in drifting of the soil. For instance take two lumps of soil, one fairly moist and the other dry, when we roll the first one in the hands dry rolling or kneading, it will stick together, but the other one as soon as we work it a little it will crumble away in small particles. Of course the ground must not be worked when it is too wet, it is liable to get hard and such soil cannot check the evaporation of the moisture. I will outline here in brief what I believe is up till so far the best way to work our fields in preventing soil drifting. Land to be summer-fallowed must be cleaned from Russian thistles and other weeds the previous fall and otherwise as early as possible in the spring. After the spring work is done such fields should have a good double disking.

The advantages of disk before plowing are:

1. The stubble and the early growing plants are thoroughly mixed with the soil and will rot very quickly forming a substance which will keep the soil particles better together.

2. The plowed ground is turned over much better and the necessary cultivation more easily restored.

3. The seeds will better hold in the plowing is done, as the top soil is turned over so completely that the seeds have no chance to grow.

4. There is more time for plowing as the disking keeps the soil moist enough to perform this work in a proper way.

5. The moisture in the ground is practically all saved and will benefit the next crop adding if few more bushels of grain to the acre. Every day's plowing should be packed the same day to restore the capillarity and making the seedbed more solid. It is a bad practice to have the plowed ground too long unpacked, as loose ground dries out very quickly and makes it more liable for drifting. This packing must be done with a surface packer and not a subsurface packer as the latter leaves the top soil loose.

After the plowing and packing is done we have to protect the ground as much as possible for drifting. To do so we have to use a discultor and make the fields ridge; the direction must be at right angles to the prevailing wind. In our locality the west winds almost always, so the cultivating must be done from north to south. When the cultivation is done the fields should be left alone until the next spring; if some weeds are coming up those can easily be destroyed with a hoe. In the spring another cultivation is all that such worked fields need. The seedling must commence as soon as possible after the cultivator has done its work, because the top soil will dry out very quickly and dry as soon as the ground has been worked up. Seeding with a press drill is the best, but when not on a press a single disk drill will serve very well too. Below is a little sketch to show how I think that the ridges are protecting our soil from drifting.

The law of Nature, that when a body is moving or without movement will stay in its position as long as other factors change it. The air in the spaces between the ridges is without motion, but when the wind is blowing fiercely it slugs along with it a part of this air, what moves slowly over the top of the ridge and falls down in the next space, as there was just before some air stuck away. So the wind is less strong where it is touching the ground than it is higher. When this system is followed the ridges are protecting our soil from drifting.

The law of Nature, that when a body is moving or without movement will stay in its position as long as other factors change it. The air in the spaces between the ridges is without motion, but when the wind is blowing fiercely it slugs along with it a part of this air, what moves slowly over the top of the ridge and falls down in the next space, as there was just before some air stuck away. So the wind is less strong where it is touching the ground than it is higher. When this system is followed the ridges are protecting our soil from drifting.

The law of Nature, that when a body is moving or without movement will stay in its position as long as other factors change it. Miscellaneous

Under this heading I want to mention a few points which should be well observed.

Start cultivating and seeding always on the wind side of the field.

Where drifting soil is lying, disk some manure or rotten straw into the ground before and after plowing. Never use a disk or a harrow in plowed fields, it will pulverize the ground too much; weeds can be destroyed with a cultivator better than

WINNIFRED

The Ladies Aid will meet in the Global Rest Room, Stow Thursday April 23rd. Mrs. M. J. Collins and Mrs. J. V. Denison will serve luncheon everything cordially invited.

The C.P.R. and F.W.A. will enjoy another social evening Saturday April 30th. Ladies please bring lunch everything free come and enjoy a real good time bring the young folks.

Mrs. J. E. Hinck received a wire from the Stock had visited at the home of her daughter Mrs. W. G. Clark April 15th, at River Bend, Atha.

Mrs. Clark previous to her marriage

was with the Union Bank of Winnifred, her many friends send congratulations for the happy event.

Miss King of Calgary has been employed to teach the Northumberland School she comes highly recommended.

Miss Penstock will be the new teacher at the Fawn School the remainder of this term. Miss Penstock just returned from the University and will make a splendid teacher.

Mr. Fred Roushiner of Medicine Hat motored up last week to visit his farm.

Mr. J. W. Denison received a call by this week

Mr. W. O. Larsen of Grassy Lake

motored down and Sunday at the home of his brother James Larsen.

Scotty Penny's many friends are glad to learn he is recovering slowly from his lightning sickness.

The Norwegian Ladies Aid will meet at the home of Mrs. Jas. Larsen April 28th, everybody cordially invited.

Mr. H. J. Clarke agent for the British American Paint Co. was in Winnifred Thursday.

R. STATEMA:

Schedule "A"

MORTGAGE SALE

PURSUANT to the Order of His Honor Judge Jackson made the 14th day of April A.D. 1921, in a certain action wherein Fred Alvin Parker is Plaintiff and Canadian Credit Men's Trust Association Limited (Assigee of Thomas W. Dyer) and Thomas W. Dyer are Defendants, the following lands and premises in the Province of Alberta, namely, the East Half of Section Thirty-one (31) in Township Eight (8) Range Nine (9) West of the Fourth Meridian, will be offered for sale by public auction on the 11th day of May A.D. 1921 at the hour of ten o'clock in the forenoon in front of the Post Office in the Town of Bow Island in the Province of Alberta.

On the property there is said to be a house in poor repair.

The property will be offered for sale subject to a reserved bid and subject to the reservations contained in the original returns from the Crown and in the existing Certificate of Title and to all outstanding taxes, rates and assessments, levied or assessed against said lands.

TERMS OF SALE: 10% in cash at time of Sale; 25% in 10 days; 25% in 60 days and the balance in six months from date of sale, with interest at the rate of 6% per annum.

FURTHER DIRECTIONS may be had from the Auctioneer or the Undesignated Solicitors:

SHEPPARD, DUNLOP & RICE,

Lyethbridge, Alberta.

SOLICITOR FOR THE PLAINTIFF HERIN.

ROY S. BEATTIE, AUCTIONEER,

BOW ISLAND, ALBERTA

Spring weather prevails again and if it continues weeding will be general by the end of the week, all work on land has commenced, sowing conditions will be excellent as there is more moisture than usual.

The delay in the Seed Agent coming is certainly causing much anxiety in the district, which will hinder seed sowing.

The land formerly owned by Geo. Cope has again changed hands, A. J. Martin and G.M. Dilidice of Spokane being the purchasers both families will be Winnifred this month.

Mr. T. Curran of Saskatoon, Saskatchewan has a large three story hotel at Brook, Sask., for 560 acres of land south of Town of Brook, this land belonged to Luse-Land Company of Portland Oregon and at one time John Leneau owned this land.

Mr. Roy McLean made a business trip to Lethbridge this week

Geo. Oliver manager of Bow Island Globe Store Sunday at the home of H.H. Smith.

Miss Annie Lawson of Bundtli came down to spend the week end at the home of Mr. and Mrs. Frank Lawson

Miss A.C. Maloney was visiting with Mrs. V.M. Bryant for a few days this week

Mr. John Meloed bought the Chas. Hewitt building and is going to move it on his lots expecting to repair it at a residence.

Mrs. Jas. Castle and Mrs. W. H. Scott spent several days in Medicine Hat calling on Mr. Castle who is it learned was progressing rapidly after his operation in Medicine Hat hospital his many friends were glad to learn

Mr. John Currie made a business trip to Medicine Hat, Thursday 14th.

Miss Alice Brown came home Saturday, she spent the winter in Medicine Hat

Miss Minnie Cadieux and mother came up from Seven Persons in Sunday at the home of Mr. and Mrs. Jas. Larsen

Mr. and Mrs. Leo. Hamel of Burdett were the guests of Mr. and Mrs. A.J. Tremblay several weeks last week

Mr. Frank Baker is back from Kitchener, B.C. and is the guest of Mrs. Ed. Gosselin and Mrs. Alex Smith

Mrs. Harvey Morris and Mrs. J. W. Holder with their families returned from Winston, Sales, North Carolina, this week they have been away since last September.

The Concert given under the auspices of the Ladies Aid April 13th, proved to be a great success, entertainment programme was of the very highest order and held the audience keenly interested from start to finish, the greatest number of appliances, moreover to those who were taking part, that their efforts were greatly appreciated, every part being enjoyed, highest praise is due to the Tabor Sisters of Medicine Hat in their many melodies and Mr. M.J. Hills in his excellent recitation.

Mr. Fred Roushiner of Medicine Hat motored up last week to visit his farm.

Mr. J.W. Denison received a call by this week

Mr. W.O. Larsen of Grassy Lake

motored down and Sunday at the home of his brother James Larsen.

Scotty Penny's many friends are glad to learn he is recovering slowly from his lightning sickness.

The Norwegian Ladies Aid will meet at the home of Mrs. Jas. Larsen April 28th, everybody cordially invited.

Mr. H. J. Clarke agent for the British American Paint Co. was in Winnifred Thursday.

The delay in the Seed Agent coming is certainly causing much anxiety in the district, which will hinder seed sowing.

The land formerly owned by Geo. Cope has again changed hands, A. J. Martin and G.M. Dilidice of Spokane being the purchasers both families will be Winnifred this month.

W. A. BATEMAN

Secretary-Treasurer

Work of The Red Cross

Giving Medical Attention to Those Who Live in Remote Districts
A Red Cross worker in one of the primitive sections of the west made a discovery last summer. She visited a sawmill camp and, while there, discovered a man, one of whom had been chopped half in two, with a axe and was unable to get any treatment for it. The other had suffered a kick in the chin from a mule and the jaw bone was broken. He was unable to get the bone set. They traveled to find a doctor and they traveled in vain. When they arrived there they were all in. They were put to bed and remained there until, as in the case of animals, their health failed them. They were then unable to return to receive attention at the proper time, or, indeed, at any time, is that one will limp badly for life and the other will have a terribly disfigured face.

The Red Cross, organized for peace, will, by its guidance and expert advice, make it possible for all such far away communities to have something more adequate medical attention by equipping hospitals and nurses' quarters and providing suitable surgical and medical supplies for the treatment of all such similar cases, whether of accident, disease or what not.

Not only that, but the Red Cross aims to give lessons in first aid to the sick and injured and to teach people who, by reason of the nature of their occupations, must live far from medical and nursing aids; just what they should do in case of emergency within the zone of their influence.

The Red Cross, it is realized, is needed now more than at any time in the history of the country, and it is earnestly hoped by those who are endeavoring to bring the humanizing forces of the world that Western Canadians to the very last man and woman boy and girl, will join the Red Cross when the campaign is on from June 5 to 11.

Will Help Campaign To Fight Poppers

C.P.R. Will Have Poison Laid Down Along Railroad Right-of-Way.

The C.P.R. has decided to spend the grasshopper this year by laying down poison along the railroad's right-of-way through affected areas, it is stated by Thos. Acheson, general agricultural agent of the C.P.R., in a letter to Mr. George Auld, departmental agriculturist.

Mr. Acheson states that if the municipalities will provide the poison to the section foreman at cost, instructions will be issued to foremen to distribute the bait, the work to be done under the supervision of the supervisor of the Government officials in charge of the general campaign.

In the opinion of the officials of the Department of Agriculture, the grasshopper infestation continues as serious this year as last, though the centre of attack may be slightly changed, some of the older districts heavily infested last year being more free of the pests, while it is expected that some districts comparatively immune last year may have to be protected again.

Lessons Evil.

Bill Collector—"Why do you let your wife spend all your money?" Mr. Henpeck—"Because I'd rather argue with you than her."—American Legion Weekly.

Owls are found all the world over,

OLD STANDBY, FOR ACES AND PAINS

Any man or woman who keeps Sloan's handy will tell you that same thing.

Especially those frequently attacked by Neuralgic twinges, heart trouble, rheumatism, sciatica, earaches, rubbles, the aches and pains, soon relieved by the action of Sloan's Liniment.

Keep handy and used everywhere, Sloan's Liniment relieves the pains and aches of rheumatism, neuralgia, muscle strain, joint stiffness, sprains, etc.

You just know from its stimulating, invigorating effect that it is good Sloan's Liniment sold by all drug stores.

Sloan's Liniment

North Offers Canada Great Opportunity

Laird River Will Produce More Than The Yukon.

In 25 years, with an efficient development programme, J. T. Burns, engineer, geologist and mining pioneer, believes the northern country will be producing \$500,000,000 annually. "Canada's great opportunity lies in the north," he stated.

"I have spent 20 years in the Yukon," Mr. Burns continued, "and have seen the timber cut and used to the other, so I may be said to have known the Yukon as well as most old southerns. But from what I have seen of the Laird River and its head streams I am convinced that for production we are in the Yukon."

Mr. Burns is urging construction of a railway from Stewart into the Laird Country about the confluence of the Dease and Frances Rivers, and thence north to Fort Norman or east to Fort Simpson, the confluence of the Laird and MacKenzie.

At present, oil wells are not yet tapped out, but would only tap the newly discovered oilfields, but would open up the Groundhog coal country and the placer gold and quartz district west of Fort Simpson.

The St. Lawrence Canal, Mr. Burns claims, is the logical outlet for the mineral products of the Mackenzie River basin, and he backs up his contention by reference to the map. From Stewart to Fort Norman is 22 miles less than from Edmonton to Fort Simpson.

In addition to this, Stewart is at bittersweet, while Edmonton is hundreds of miles away from it.

Mr. Burns' plan for the mineral products of the Mackenzie River basin, and he backs up his contention by reference to the map. From Stewart to Fort Norman is 22 miles less than from Edmonton to Fort Simpson.

Stewart is approximately 500 miles less than from Edmonton to Fort Simpson. In addition to this, Stewart is at bittersweet, while Edmonton is hundreds of miles away from it.

Mr. Burns' plan for the mineral products of the Mackenzie River basin, and he backs up his contention by reference to the map. From Stewart to Fort Norman is 22 miles less than from Edmonton to Fort Simpson.

Stewart is approximately 500 miles less than from Edmonton to Fort Simpson.

In addition to this, Stewart is at bittersweet, while Edmonton is hundreds of miles away from it.

Flour Drops

Flour has taken a drop of fifty cents in Winnipeg, so we can soon expect it down in price here and that will make the ladies smile.

Merchants can get free cuts of all kinds of Goods to Advertise in the Review, from the Grain Growers Guide, Winnipeg, these cuts can be had for the asking.

**News of the Past and the Future
South of Burdett.**

From our own Correspondent

On Monday of last week some farmers gave a surprise party to Mr. and Mrs. N.H. Strom on the anniversary of their wedding day. Mr. Chas Jacobson was the speaker who had the pleasure of addressing over 100 guests and hosted a nice crystal present. Mr. Jacobson said in very plain language so everybody was able to understand it, the meaning of weddings, weddings, and also of tin and crystal ones. I have heard Mr. Jacobson speaking many times before but never better than this time, no wonder that there was much applause when he had finished his speech. The host afterwards spoke thanking the guests for their present and also for the honor done to him and his wife by their visit, it was just a few words, but was well said and she earned the applause which followed his speech.

Mrs. Alice Poole sang and played on the piano which was much appreciated. Afterwards the time was spent in talking and playing games.

Mr. Gagnon who arranged this party had plenty of success with it, and we hope he will arrange another one even if it is in the busy season, as we farmers gain anyhow by having a good time, too bad Mr. Gagnon had the toothache it spoilt his fun. I advised him to drink only water, not eat any cakes or sweets. I don't know if he followed my prescription but if he has and also seen a dentist he should be feeling better by now.

There is not much news at present the farmers are too busy in the fields some have already seeded a few acres of oats for early green feed, wheat seeding will be general about the end of this week.

Mr. Vos arrived in Burdett on Wednesday, his health seems to be very much improved since his visit down south.

Mr. Chas Jacobson was holding the two last Sunday services in the Scandinavian language at the Ballman School.

Mr. Gagnon has moved, but he did not go as far as he intended to do He moved on to the S.E. 1/4 of 31-8-11 and adjoining 1/4 of 30. My opinion is that Mr. Gagnon will go into mixed farming as there is plenty of grass and near his new place.

Well Mr. Editor I have not heard from that chivalrous party I was writing about last week but I know of one on the place of Mr. F. B. Cook, but that was not very much of a chivalrous at all fault with him was that it was almost all Scandinavian immigrants and when those got the sandal of good coffee and fine cigars they give right at them. Instead of doing the same old side, they were sitting inside drinking coffee, smoking cigars and taking about the possibilities of a trade war between Burdett and Foremost. Well of course people can choose their own talk to talk on, but I don't like that kind of talk especially when they are neglecting their duty at the same time not chivareeing and that is what they went for.

Purple Springs

Miss Slovik, formerly of Burdett and in the employment of Mr. Abbott, is now moved to the District of Grassy Lake a very sick woman. The Dr. seems to say they can do her no good.

Constable Bradner was on duty at Grassy Lake and Purple Springs and District on Wednesday last.

Dr. Carter has settled down at

Taber.

Grassy Lake

Mr. and Mrs. W. McKenzie, of Lethbridge, are the guests of Mr. and Mrs. Alex. Hutchinson.

McPhail made a professional trip here on Tuesday last.

The people of Grassy Lake had such a surprise when they discovered a little girl had arrived at the home of the Rev. Mr. and Mrs. Lawrence.

—

Mrs. Chas. Scott's friends will be very glad to know that she is much better.

Miss Cook is expected this week to return with her aunt, Mrs. Chas Scott for some time.

—

Mr. H. Scott is moving to his farm this week and will be very busy planting trees thereon. This all helps to beautify the country.

satisfaction.

A TRIAL IS SOLICITED

Hugh Scott was a business visitor to Burdett on Tuesday

Mr. Legg the Customs House Inspector was a visitor last week when he thoroughly inspected the local port

Mr. J. W. Emerson, Tabor, Ontario is staying in Burdett where he has many financial interests.

Burdett Hospital was busy last Monday evening: four Bow Island and Winnifred patients who were out it is said organising the district for the new Bell League were in a hurry to get from Grassy Lake here. Unfortunately something went wrong and the car took a header. All were pitched out and sustained injuries more or less serious. They were soon helped and brought on to Burdett where they were sent to the Hospital. Dr. McPhail at once got busy and was able to let three proceed home but the most seriously injured man was held and at time of writing is still there.

The Methodist Church adopted a new plan last Sunday. The back of the Organ faces the people and to it was fastened a printed Notice respecting "Sunday Laws" "The Game Act" and "The Lord's Day Act". The large print could be read but the majority of the congregation were unable to make out the smaller print. Is not the proper place in such notices on the Church door instead of on the platform? The Pastor preached an excellent sermon with real point to it, there is no question but that it was an address which should help people who think at all. He showed that however much Christian Churches and beliefs may differ in small things fundamental they are founded on the same basis.

The New Restaurant whose advertisements appear today is now in full operation. Mr. Clark reports that although there are not many people moving these days, still he has more customers than he expected.

Basket Ball will soon be in full swing. The young people have a nice ground close to the School where they are to be seen in full practice. Many close games with other towns are expected to be played during the summer.

Missionaries A. Sted and O.F. Greenback of Lethbridge will speak at the L.D.S. Church next Sunday afternoon at 2 o'clock, these men are two of Alberta's greatest speakers and you will surely enjoy hearing them, don't fail to be there. All that heard Missionary A. Sted when he last month reported him a great speaker.

If rumour is true the visit of the C.P.R. officials here last week is the forerunner of great activity on their premises this year. They are said to be about to sink a further two wells as the one which has been running for over a year has proved that while it is satisfactory as to water there is not enough to give the supply required but that with two more the Company will have ample to take care of the engines which have to take water between Tabor and Medicine Hat.

Farmers are having quite a time buying man for farm work. It seems there are two reasons for this—first the men are very scarce and second those who are available are holding out for very high wages which it is impossible to pay. C. C. Fielding has been able to get a few this week and those who want men will be well advised to let him know their requirements so he can arrange with the Government Labour Bureau to send them as they can be placed.

Church Notice
